Education

Florida Institute of Technology
M.S. in Aerospace Engineering *Dec 2026*
GPA: 3.85

Virginia Tech
B.S. in Aerospace Engineering *May 2025*
GPA: 3.54 (Major: 3.66)

Minors: Computer Science, Mathematics

Accomplishments: First Place, Senior Design 2025 – Prize for Excellence in Air Vehicles (Aerodynamics Lead)

Professional Experience

Progressive High-speed Applied Simulations and Experiments
Paid Researcher *May 2024 – July 2025*

- Designed and tested a mechanical traverse system and pitot-static probe for inflow congruity characterization and general use in the Hypersonic Wind Tunnel, utilizing RANS CFD and FEM throughout the design process.
- Provided experimental support and data contributions for co-authorship on two AIAA SciTech papers (FLDI and self-aligned Schlieren); drafted sections of a NASA-sponsored report on non-invasive instrumentation.
- Developed mechanical and electrical systems that increased tunnel capabilities, operational reliability, and safety.
- Supervised undergraduate researchers, delegating tasks and reviewing results to support project progress.
- Developed software for wind tunnel operations, including traverse control, data acquisition, and post-processing.
- Created a new manual and standard operating procedure for a hypersonic wind tunnel.

Flight Simulation and Pedagogical Application
Student Researcher for Credit *Jan 2023 – May 2023*

- Assessed the use of X-Plane flight simulator in undergraduate education by recreating and flying existing aircraft.
- Modeled and tested real-world feasibility of a Senior Design team's aircraft in X-Plane.

Leadership Experience

Virginia Tech Crew Team
President *2024 – 2025*

- Managed a team of 60+ members, a board of 7, and two coaches.
- Hosted weekly board and team meetings; planned practices.
- Oversaw a $60k annual budget and coordinated donor relations.
- Developed long-term projects for team success after graduation.

Virginia Tech Crew Team
Equipment Manager *2023 – 2024*

- Maintained and repaired boats, oars, and equipment to ensure reliable use.
- Coordinated with vendors for replacements and upgrades.

Ocean City Beach Patrol
Lifeguard *2021 – 2023*

- Communicated rules to high volumes of people.
- Assisted in rescues and medical situations.
- Trained new lifeguards.

Skills

Coursework: Applications of FEM, Principles of Composite Materials, Viscous Flows

Software: SolidWorks, Ansys, StarCCM+, LabVIEW, LaTeX, Git

Programming: MATLAB, Python, C, Java, Mathematica, HTML/JavaScript, VBA

Training: SAE Geometric Dimensioning & Tolerancing (GD&T), ASME Y14.5-2018
